Experience

2023 Elevate Digital UX/UI Designer

I worked with the Creative Director to enhance client projects by implementing streamlined designs that elevated the user experience. I crafted new e-commerce website designs to bolster branding and marketing strategies. Furthermore, I optimized existing web pages to deliver a seamless user experience.

I enhanced the user experience of client product e-commerce websites by creating captivating animations. Additionally, I developed new designs for our company's onboarding presentations and improved client product pages across both print and web platforms.

2022 Family Central UX/UI Designer

By partnering with the Creative Director and design team, I successfully implemented a consistent brand identity across all mobile and web screens of the Family Central app, resulting in a seamless user experience through the utilization of the efficient design system in place.

I collaborated with the development team and project managers to redesign the app's features, enhancing user experience and creating a sleek, modern interface. This resulted in increased user engagement and an overall improved experience.

2022 TechGC UX/UI Designer

By conducting both generative and evaluative research, as well as auditing competitors, I was able to pinpoint opportunities for improvement and formulate solutions for the platform.

I devised user experience solutions to address the current platform's pain points, enhancing the website's flow and aesthetics.

2014-2020 Angels' Cup Cofounder/COO

I developed and sold a unique coffee tasting subscription business that filled a market gap. Within seven years, it became profitable, generating millions in revenue. I prioritized brand identity, UI consistency, and user experience, employing surveys, testing, and data analysis. Through design solutions and new features, I achieved a seamless user experience.

I led packaging redesign and strategic supplier partnerships, reducing costs and increasing margins by 30%. This re-branding effort forged strong relationships with coffee roasters nationwide, granting them access to 1,000 new customers weekly, expanding their reach significantly.
